

Final Assessment – Agile & DevOps in Practice (Individual Test)

Sprint 0 – Planning

Product Vision

Create a simple Java console application that helps students manage their daily tasks by allowing them to add, view, complete, and delete tasks.

ID	User Story	Priority	Story Points
US1	As a user, I want to add a task so that I can remember my work.	High	3
US2	As a user, I want to view all tasks so that I can manage them easily.	High	2
US3	As a user, I want to mark a task as completed so that I can track them when needed.	High	3
US4	As a user, I want to delete a task so that I can clean up old ones.	Medium	2
US5	As a developer, I want application logs and a health check for monitoring so that I can check how the system is behaving.	Low	2

Acceptance Criteria

User Story 1

- User enters a task name.
- Task is saved.
- Confirmation message appears.

User Story 2

- Displays all tasks.
- Shows completed/not completed status.

User Story 3

- User enters task number.
- Task becomes completed.

User Story 4

- User enters task number.
- Task is removed.

User Story 5

- Console prints logs.
- Health check prints "Application is running."

Definition of Done

A feature is complete when:

- Code compiles
- Feature works
- Unit test passes
- Code committed to GitHub
- No major bugs

Sprint 1 Plan

Deliver:

- US1 Add Task - Done 
- US2 View Tasks - Done 

Sprint 2 Plan

Deliver:

- US3 Complete Task - Done 
- US4 Delete Task - Done 
- US5 Logging & Health Check - Done
